

Migration Phases

- **Project structure setup**
- **Frontend component migration**
- **Backend proxy/script development**
- **Build process configuration**
- **Testing and optimization**
- **Automation on Code Merges**

New Architecture Overview

- Frontend (src/, vite.config.ts)
- Backend Proxy (meetup-proxy/)
- Static Assets (static/, public/)
- Configuration (.env, tsconfig.json)
- CI/CD (.github/)
