

Stick to what you know

Enhance what you don't.

- No .net/C#
- Static website
- HTML/JS/CSS
- So... React!
- Github Pages!
- Github Actions? — DevOps, CI/CD, Automation
- Python Scripting

Technology Stack

The Plan

- **Frontend: Vite + TypeScript + React**
- **Backend: Python Proxy (meetup-proxy)**
- **Build Tools: PostCSS, ESLint, Prettier**
- **Modern development workflow: Shift Left, Automate, Code Quality, etc...**
- **Or... DevOps integration via Github Actions**
