

Start from a general, but detailed prompt...

...it's a conversation, after all.

I need to update the website for the Roanoke Valley .NET User Group (RVNUG) at rvnug.org to make it a modern and appealing website by 2025. The goal is to enhance user engagement and attract potential community members, as outlined in the provided research report.

Before offering any code solution, please ensure the following requirements and considerations from the report are addressed in your approach:

Prompt Criteria

1. Content Update & Information Accuracy
2. Modern Design & Visual Appeal
3. Enhanced User Experience (UX)
4. Community Engagement Features
5. Engaging Content Strategy
6. Essential Website Functionality
7. Accessibility and Inclusivity
8. Strategic Use of Calls to Action
9. Technical Considerations
