- Workflow\_State.md
- Project\_Configs.md
- README.md
- PROMPT.md
- ./cursorrules

# Did Anyone say Charts or Diagrams?

- How often are diagrams built for your products?
- Which diagrams communicate the most?
- Wouldn't it be great if we could have the diagrams created?
- What if it didn't matter whether they were created before, during or after?
- Does that make another tool which helps us understand what we are building?
- Do we understand what the AI assistant is building?
